## Resume

I'm a talented and professional mobile developer with five (5) years of experience developing detailed and engaging cross-platform mobile apps for many clients in Latin America with a refined stack of mobile technologies including React Native, Kotlin and Swift, I've worked remotely for recognized companies such as Universal or Warner with a track record of collaboration and team leadership with the sole purpose of delivering great and refined mobile apps while maintaining an scalable and graceful developer experience, as a developer I like to keep things simple and organized without losing any util feature for a product. My core skills include quickly adapting to changes and fast learning, enabling me to deliver high-quality and visually stunning products.

## Experience

### **SR FULL-STACK DEVELOPER | TOOLBOX | URUGUAY | DECEMBER 2021 - CURRENT**

- Development and maintenance of Over-The-Top (OTT) Media platform for clients such as Universal Plus, Mio TV and TyC sport using React Native .
- Collaborated with ten team members from the conception of the product to the app deployment, coding and debugging several features such as Video-On-Demand and Live Streaming playback, leading me to deliver an amazing user experience for watching series and movies, increasing user revenue up to 30% and user retention up to 50%.
- Participated in code reviewing and feature suggestions, giving other developers constructive feedback and code techniques that by being implemented result in an improvement of components performance and product optimizations.
- Identified and resolved issues within the old codebase leading to an overall improvement of user experience and a performance boost of 20%.
- Successfully integrated native modules written in Kotlin and Swift to React Native codebase enabling the use of native functionalities within javascript which allows the use of a more extensive and performant API.
- Successfully carried out end-to-end testing of several components and features using Detox and Cucumber ensuring clear, modularized and well-abstracted code.

### **SR FULL-STACK DEVELOPER | PROFESSIONAL SERVICE CL | CHILE | NOVEMBER 2020 - NOVEMBER 2021**

- Developed a mobile app with React and React Native for allowing clients from Chile to book technical visits ensuring an appealing and seamless user interface.
- Successfully integrated Geo Localization API on the frontend to keep track of worker position around the city, this allowed business to keep control of workers localization to ensure a fast and satisfactory answer to their client.
- Actively participated in payment gateway integration so clients can pay by using the web app and save up to 2 hours of administrative tasks for the business department.

- Implemented design system and documentation by using storybook allowing developers to quickly add or modify features.

### **SSR Full-stack Developer | National Corporation of Guayana | Venezuela | April 2017 - July 2020**

- Completely refactor and ship a single page application (SPA) based on an outdated version of a project manager system to keep track of project status using React JS and Bootstrap.
- Development of simple resource API for making CRUD operations using Laravel.
- Designed and implemented Relational Database by crafting entity-relation diagrams and then coded using Postgres.

## **Education**

### **COMPUTER SCIENCE ENGINEER | 2017 - CURRENT | EXPERIMENTAL NATIONAL UNIVERSITY OF GUAYANA**
